

# Cloud Security Posture Management CSPM

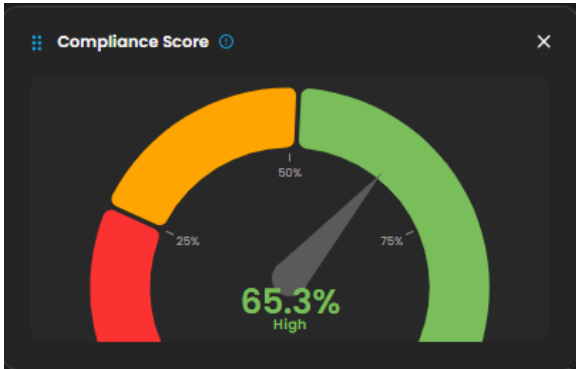

Welcome to the **Cloud Security Posture Management CSPM** module.

The Cloud Security Posture Dashboard provides a streamlined view of your AWS compliance status. It highlights the overall security posture, identifies areas needing attention, and tracks compliance across key AWS services. This dashboard helps teams quickly assess risk, monitor changes over time, and prioritize remediation efforts. It also offers visibility into recent evaluation results, supporting proactive cloud security management.

## ACCOUNTS EVALUATED:

In this section here is the total number of cloud environments that have undergone security assessments.

### COMPLIANCE SCORE:

This is the Compliance Score provides an aggregated score reflecting the extent to which your cloud environments comply with configured security policies and standards.

### COMPLIANCE BY CIS:

This section displays the percentage compliance status across various security benchmarks defined by CIS (Center of Internet Security)

Compliance By CIS ⓘ

Simple Storage Service (S3)

Monitoring

Logging

Networking

Elastic Compute Cloud (EC2)

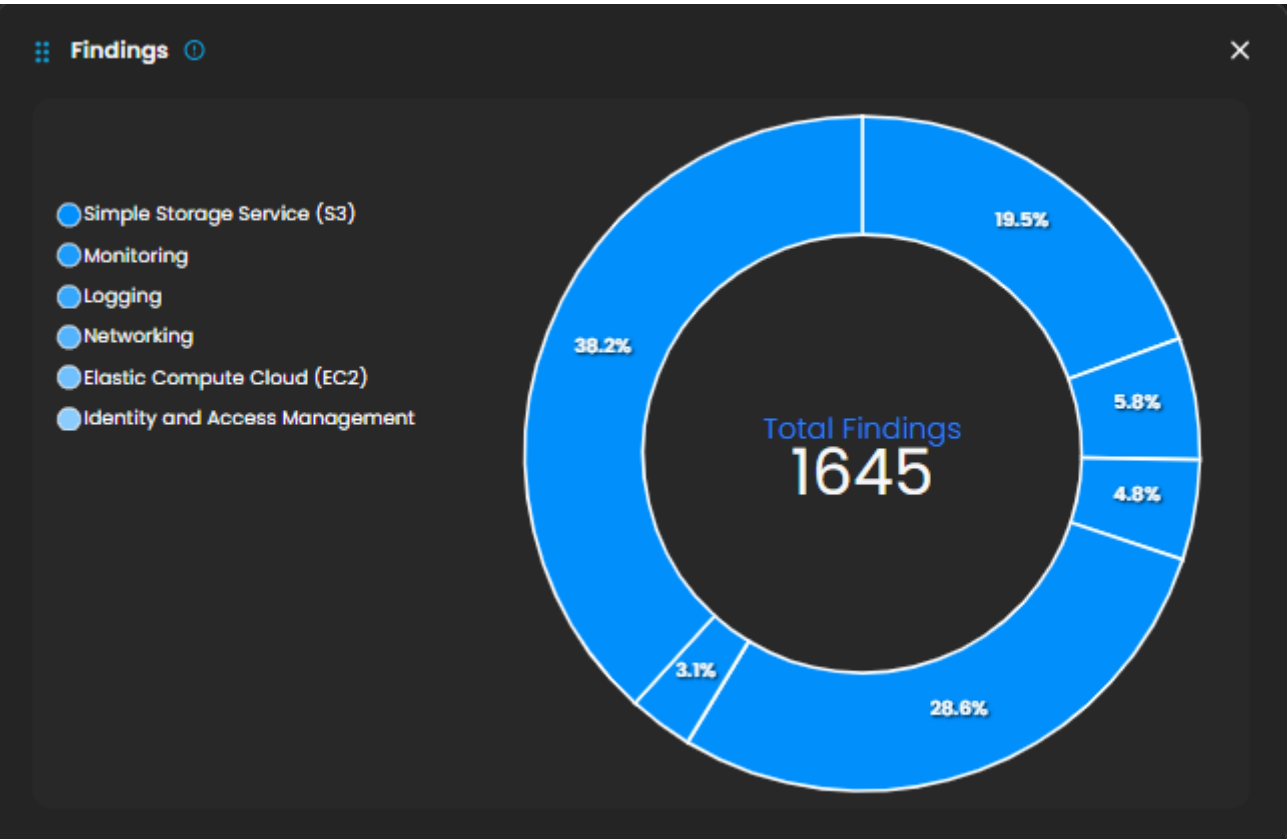

IAM

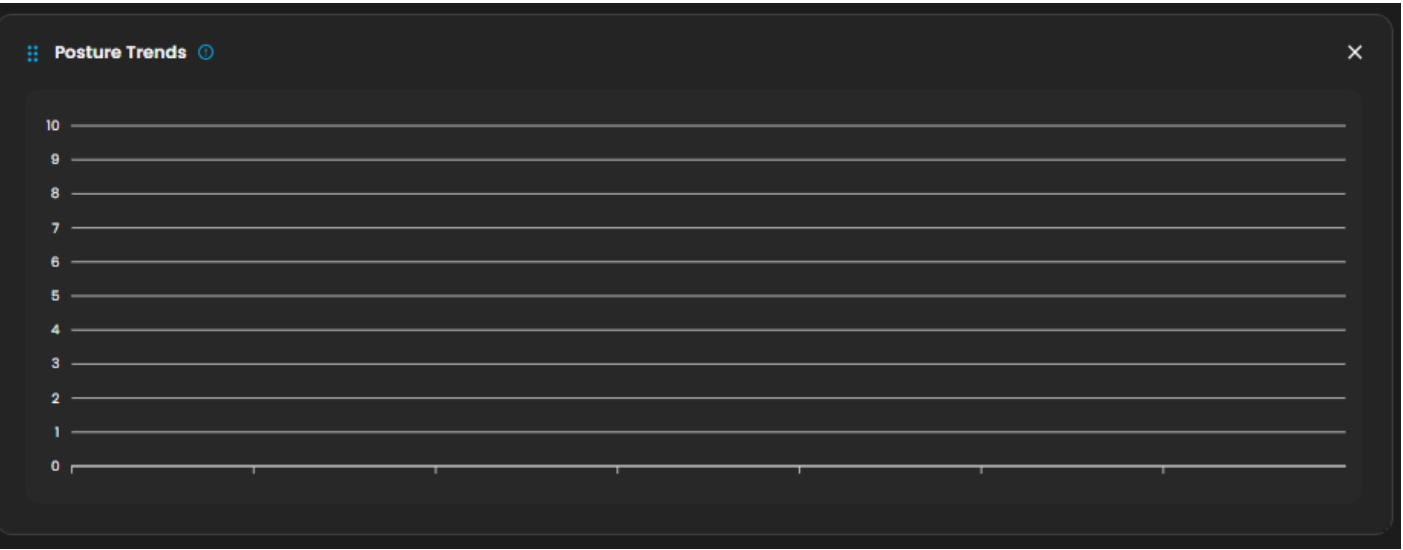

FINDINGS:

Summarizes the total count of identified security issues or findings within your cloud environments.

POSTURE TRENDS (Graph):

Illustrates the historical trajectory of your security posture changes overtime, aiding in monitoring improvements or potential vulnerabilities. (Due to insufficient data there has yet to be a graph inputted into this as of creating this manual).

Posture Trends ⓘ
