### One Blood Ransomware Attack Disables Their IT System

2024-08-01T08:00:13

Topic: Daily News

Yesterday, July 31, 2024, OneBlood, a not-for-profit blood center, in Orlando, Florida, announced through their website that they were hit by a ransomware attack affecting its software systems. The cyber attack greatly impacted their operations, disabling their system, and forcing the organization to operate at a reduced capacity and implement manual processes. "We have implemented..."
