

Daily Update: July 23

Here are the main updates of the CISO Workplace:

New Module: **Virtual Penetration Testing**

SOAR Improvements

- Display all actions of rule

The screenshot shows the 'Control Panel' interface with the 'Alerts' tab selected. The left sidebar contains 'Alerts Tagging', 'Alert Rules', and 'Tools'. The main content area displays details for a rule named 'Malware - Detected - Elastic Endgame [cytech_developmentoperations]', which is currently active. The rule's 'About' section states: 'Elastic Endgame detected Malware. Click the Elastic Endgame icon in the event.module column or the link in the rule.reference column for additional information.' The severity is 'Critical' and the risk score is '99'. A tag 'Data Source: Elastic Endgame' is associated with the rule. Below the rule details, the 'Action' section is titled 'Perform the actions when these rules are triggered.' and includes a search bar and a '+ New Action' button. A table below shows one action: 'Malware' with a 'Summary Alert' tag and an eye icon.

- Display all actions of alert tag

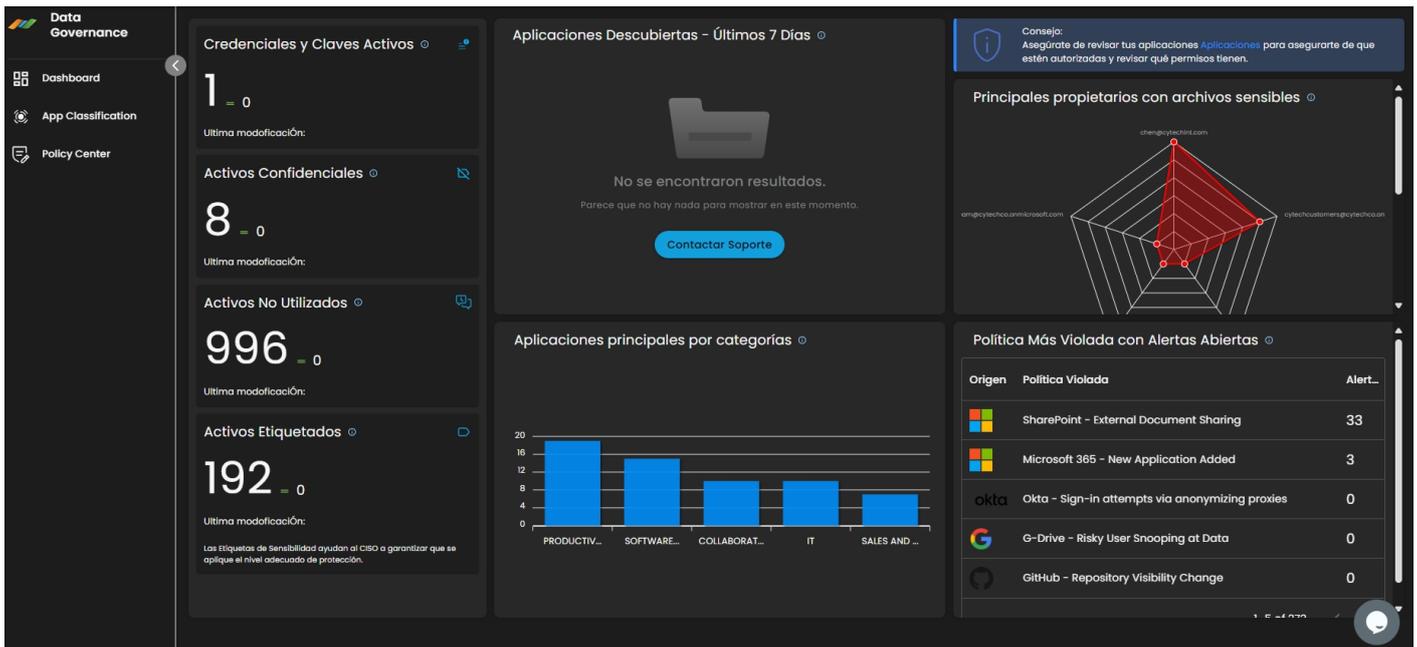

The screenshot shows the 'Control Panel' interface with the 'Alerts Tagging' tab selected. The left sidebar contains 'Alerts Tagging', 'Alert Rules', and 'Tools'. The main content area is titled 'Alert Tagging' and includes a search bar. Below the search bar is a table with two columns: 'Tag' and 'Actions'. The table lists various tags and their corresponding actions.

Tag	Actions
CVE	+ Add Action
Continuous Monitoring	+ Add Action
Data Source: APM	+ Add Action
Data Source: AWS	+ Add Action
Data Source: AWS CloudWatch	+ Add Action
Data Source: AWS Cloudtrail	+ Add Action
Data Source: AWS EC2	+ Add Action
Data Source: AWS IAM	+ Add Action
Data Source: AWS KMS	+ Add Action
Data Source: AWS Lambda	+ Add Action

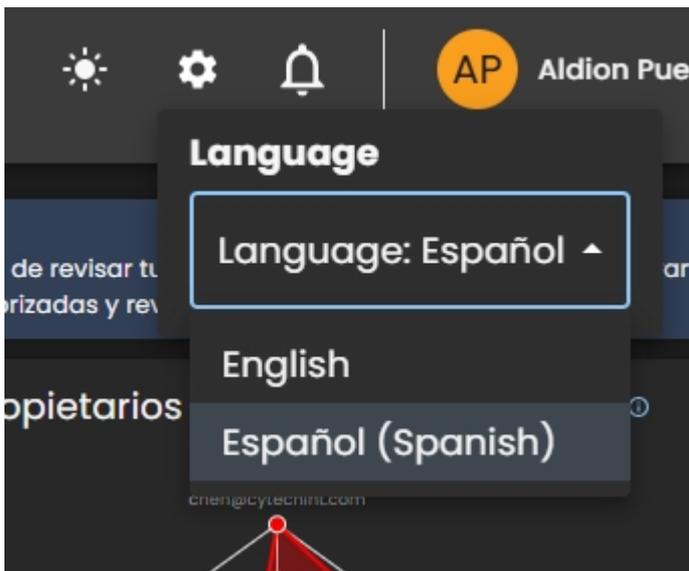

At the bottom right of the interface, there is a pagination indicator: '1-10 of 106' with left and right arrow icons.

Data Governance Improvement

- Initial Spanish Translation

Change in Language Select Menu
