

Daily Update: September 6

Here are the main updates of the CISO Workplace:

UEBA Updates:

Anomaly Summary Support

Anomaly Summary

The Summary of your Anomaly Alert

Unusual AWS Command for a User

Security: Cloudtrail - Looks for AWS API calls that, while not inherently suspicious or abnormal, are sourcing from a user context that does not normally call the method. This can be the result of compromised credentials or keys as someone uses a valid account to persist, move laterally, or exfil data.
