

New Module (July 12): Vulnerability Assessment and Management

📁 New Module Release

We've just dropped a new module: **Vulnerability Assessment and Vulnerability Management**

📁 New Features:

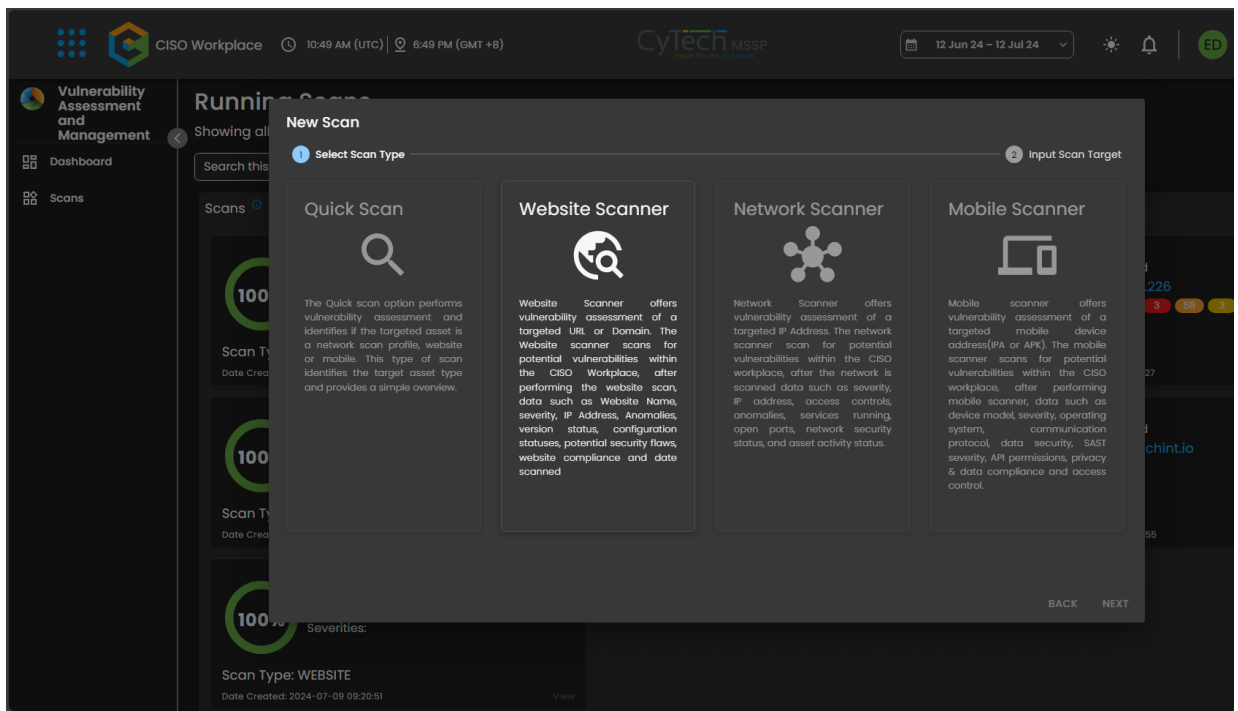

- **Dashboard components:**

- Overall Vulnerability Score
- Overall Vulnerability Score - Trend
- Vulnerabilities by Severity
- Vulnerabilities by Asset Type

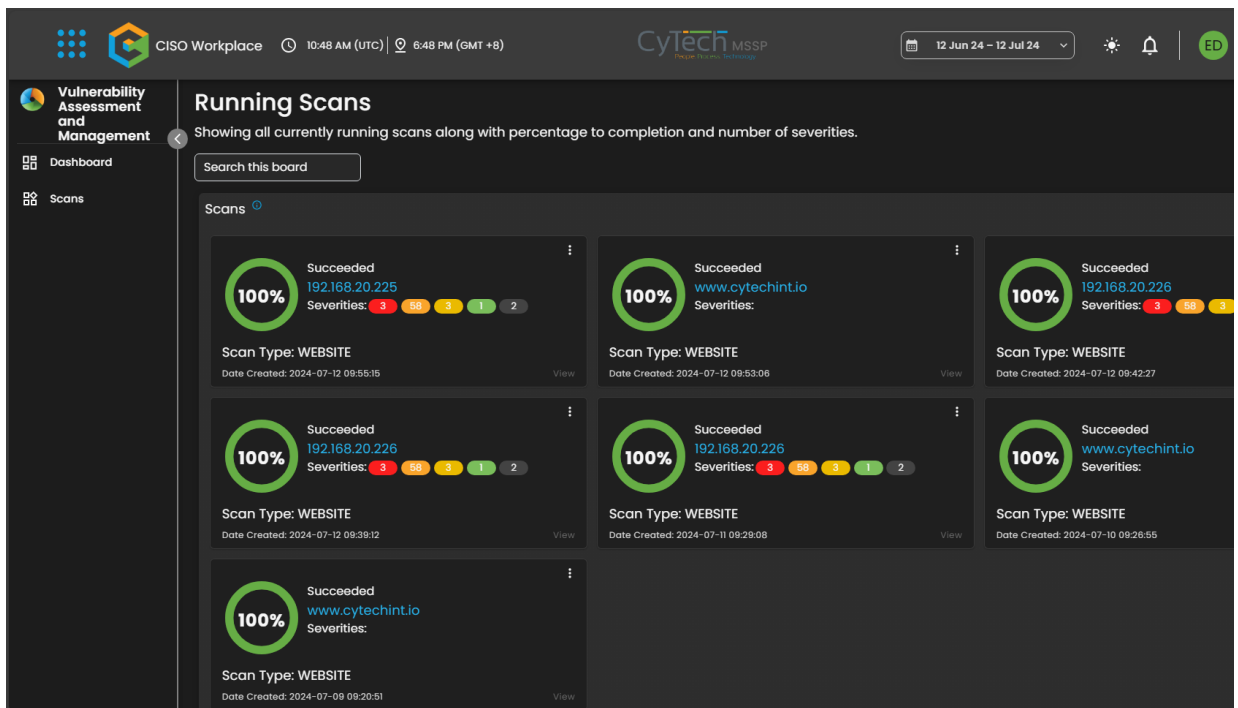

- **Scans Page:** After starting a scan, needs page refresh to see the running scan.

- Scanning Capabilities:
 - Website Scanner only, using NMAP. Network Scanner, Mobile Scanner, and Quick Scan are not yet supported.
 - Able to show CVEs of a website/website port.

Known Issues:

- When there is a running scan, there is no data in the Dashboard. When all scans are finished, there is data present.
- No descriptions for CVEs yet

Stay tuned for more exciting updates!
